About the Author..... *xiii*

Part I Servlets **1**

Chapter 1 Servlet Theory **3**

What Are Servlets?..... *3*

The J2EE Approach to Servlets..... *5*

Touring the javax.servlet Package..... *25*

Touring the javax.servlet.http Package..... *78*

Maintaining State in an HTTP Connection..... *120*

Chapter 2 Sharing Servlet Resources..... **125**

What Are the Forwarding and Including Patterns?..... *126*

Leading-Edge Patterns—in a State of Flux..... *127*

Sharing Resources between Servlets—A UML Approach..... *158*

Sharing a PingServlet Resource..... *165*

Chapter 3 Servlet Examples..... **185**

Shopping Cart Servlet..... *185*

The Servlet Mediator (HTTP Tunneling Servlet)..... *217*

Proceeding with Your Servlet Development..... *273*

Part II JSP	275
Chapter 4 JavaServer Pages	277
<i>Why JavaServer Pages?</i>	277
<i>Creating a JSP Document</i>	278
Chapter 5 JSP Tag Libraries	363
<i>Describing Tags</i>	363
<i>The Life Cycle of a Tag Handler Class</i>	369
<i>IterationTag Interface</i>	374
<i>Touring the javax.servlet.jsp.tagext Package</i>	423
<i>The Role of JSP Tag Libraries</i>	
<i>in Middle-Tier System Development</i>	447
Chapter 6 JSP Examples	451
<i>Using JSP Standard Objects</i>	451
<i>Custom JSP Tags-Nesting and Looping</i>	477
<i>The If-Then-Else Custom JSP Tag Example</i>	506
Part III Struts	527
Chapter 7 The Apache Struts Framework Walkthrough	529
<i>Overview of the Struts Architecture</i>	529
<i>Struts Controller Components</i>	540
<i>Struts Model Components</i>	550
<i>Struts View Components</i>	558
<i>The View and JSP Documents</i>	587
<i>Error Handling in the Survey Wizard Application</i>	602
<i>Reflections on the Struts Framework Walkthrough Example</i>	604

Part IV EJB	607
Chapter 8 Integrating with the Business Tier	609
Reviewing the Structure of a J2EE Application	609
Advantages of Using a Separate Business Logic Layer	610
The EJB Development Process	616
The EJB Life Cycle	679
EJB Deployment Descriptors	684
Touring the <code>javax.ejb</code> Package	723
Chapter 9 Example 1:	
Centralizing Exchange Rates	745
Using a Stateless Session EJB Component	745
Chapter 10 Example 2: Refactoring	
an Old-Style Web Application	791
The View of the Old-Style Web Application	792
The Model of the Old-Style Web Application	797
Creating a Generic EJB Facade for the Database	811
The LegacyFacade EJB Component Deployment Descriptor	828
The Web Application Deployment Structure	844
Chapter 11 Example 3: Entity EJBs	
for Database Integration	847
Step 1—JNDI Registry Cleanup	848
Step 2—DataSource Schema Modification	849
Step 3—Implementing the Image Subsystem	852
Step 4—Configuring the Image Subsystem	909
Step 5—Implementing the WebPage Search System Classes	924
Step 6—Configuring the WebPage Search System	974
Reflections on the Second Refactoring Step	984

Part V	Appendix.....	987
 <i>Appendix A The Java 2 Enterprise Edition Reference Implementation Server.....</i>		
	<i>Configuring the Server.....</i>	<i>992</i>
	<i>Deploying J2EE Application Components</i>	<i>1005</i>
	<i>Application Deployment in the J2EE 1.3 Reference Implementation Server.....</i>	<i>1050</i>
	<i>Configuring the J2EEv1.3 Server.....</i>	<i>1052</i>
	<i>Deploying J2EE Application Components.....</i>	<i>1054</i>
 Index.....		
		1085
